Cloud for Finance

Some of the biggest concerns for financial businesses are data security and compliance issues. RapidScale, a Cox Business company, offers a solution that provides access to enterprise-grade security to keep sensitive data confidential, all while improving agility and collaboration between employees and clients and expanding business opportunities into new markets.

Security

Cloud computing has evolved into a secure technology that rivals and exceeds traditional IT. Financial services can leverage the cloud without risking data security or violating regulations.

Innovation

Cloud allows businesses to expand quickly into new markets and adapt business processes efficiently. Enable your company to support applications that accommodate these efforts.

Compliance

Compliance requirements have put pressure on the industry to recognize infrastructure as an important part of a business model.
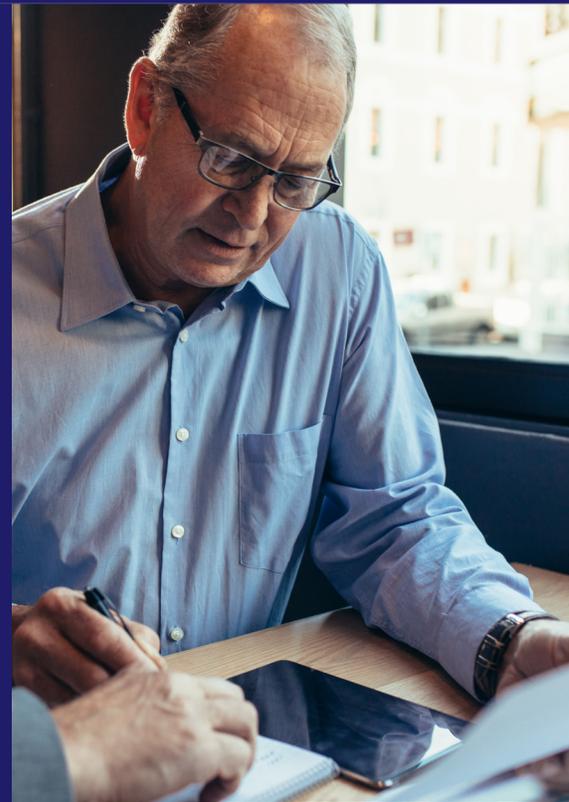

Collaboration

RapidScale allows employees across all sectors of your business to communicate and access information securely on any device, anywhere.

Reinvent Your Business

Cloud is the way of the future and the only way to stay relevant is to stay up to date. RapidScale's cloud services allow financial companies to support newer, better applications and services that meet the growing market demands for mobility and business intelligence.

Financial service organizations are constantly dealing with extremely sensitive and confidential information. You need to balance strong data protection with addressing customer needs and adapting to a rapidly changing business environment. You can find this balance in the cloud. RapidScale helps provide secure IT resources and meets industry regulations while providing a multitude of benefits that are invaluable to the financial sector.

Our cloud services also allow financial businesses to expand quickly into new markets, acquire new applications and adapt business processes to new opportunities in an efficient manner. The cloud meets the ever-growing consumer demand for easily accessible services, allowing employees to communicate with customers and provide the financial services they want and need wherever they are.

Cloud Security

RapidScale offers high-quality protection for your data and information in our secure, redundant and geographically diverse data centers. Our PCI DSS-certified data centers, which are audited annually to produce a SOC 2, Type II report, help keep your sensitive information safe and secure.

All of RapidScale's data centers feature:

- On-premises security guards
- Exterior security systems
- Biometric security systems including palm scanners
- Continuous digital surveillance and recording

They're engineered to the highest of standards to help keep your business running 24/7/365. RapidScale's certified network experts are available around the clock, ensuring you always have someone to turn to with questions or concerns.

Cost Efficiency

Cloud services can optimize IT resources, and greatly reduce capital expenses and operating costs. Instead of building for maximum capacity, you can purchase cloud space with RapidScale's pay-as-you-go model to meet your specific storage needs. You'll also experience automatic updates while avoiding the headache of hardware refresh.

Application Integration

RapidScale simplifies application purchasing and license management for your business. We can integrate some of the most commonly used business apps into your cloud environment, including QuickBooks, NetSuite, FIS, Dynamics GP and Fiserv.
