

Cloud for Insurance

RapidScale, a Cox Business company, provides cloud services with predictable, transparent pricing that allows insurers to simplify and automate IT resources and operations. Cloud computing lets you run applications securely from any device, and maximizes business agility.

Scalability

With our scalable solutions, insurers can react to market changes, addressing new opportunities or obstacles as they come.

Customer Service

Consumers want simplicity, consistency, customizability, and affordability. Meet your customers' needs with sophisticated technology to power your business.

Cost Efficiency

Insurers need to achieve profitability while remaining up to date and competitive. Cloud can cut operating costs and reduce IT ownership - and you'll always experience transparent pricing.

Compliance

RapidScale offers an easy, affordable way to prove you're in compliance with the latest industry standards.

An Insurance Game Changer

Cloud is a disruptive force in the insurance sector. It helps insurers achieve faster speed to market and greater flexibility. It also helps you address the demands of today's consumers and facilitates business transformation.

Insurance companies need to make sure their agents can be reached at all times, and that customer information is secure and accessible. The cloud allows you to have constant communication with customers through web-based applications. Clients can keep track of their accounts, ask questions and securely access important documents whenever they want.

As organizations become more mobile, RapidScale makes it simple to access your data and apps no matter where you are or what device you're using. By creating a central location for critical business data in the cloud, all parties, including sales agents, employees, developers, and more, can collaborate in real time from anywhere.

Cloud services can help insurance firms take advantage of the opportunities created by the demand for mobile connectivity. You can jumpstart new product development and launch mobile applications and products for your clients.

Cloud Security

RapidScale offers high-quality protection for your data and information in our secure, redundant and geographically diverse data centers. Our Tier 3 PCI DSS-certified data centers, which are audited annually to produce a SOC 2, Type II report, help keep your sensitive information safe and secure.

All of RapidScale's data centers feature:

- ▶ On-premises security guards
- ▶ Exterior security systems
- ▶ Biometric security systems including palm scanners
- ▶ Continuous digital surveillance and recording

They're engineered to the highest of standards to help keep your business running 24/7/365. RapidScale's 100% US-based certified network experts and engineers are available around the clock, ensuring you always have someone to turn to with questions or concerns.

- ▶ Complete data encryption in transit and at rest
- ▶ Cisco routers, and Fortinet and vShield Edge firewalls with 256-bit encryption

Cost Efficiency

Cloud services can optimize IT resources and greatly reduce capital expenses and operating costs. Instead of building for maximum capacity, you can allocate the cloud storage and resources you need to manage your IT landscape for optimal storage, application processing and IT workload needs. You'll also experience automatic updates while avoiding the headache of hardware refreshes.

Application Integration

RapidScale simplifies application purchasing and license management for your business. We can integrate some of the most commonly used business apps into your cloud environment, including AgencyBloc, CanaryAMS, VUE, Sage, QuickBooks, and Microsoft Dynamics.
