Cloud for Legal

Legal firms require the highest level of security and accessibility for confidential client information. RapidScale, a Cox Business company, provides the most advanced backup, failover and recovery for your firm, with secure access to your applications from any device.

Data Security

Data like contracts and billing information is remotely stored in a secure data center owned and managed by RapidScale, often leaving data more secure than it was in-house.

Disaster Recovery

The lifespan of data is highly important to a law firm. Our full redundancy ensures that your system is up and running, uninterrupted, even in an unexpected downtime situation.

Management

Hand off management to RapidScale and instead focus on what you do best: running your firm. This will lead to higher quality of work, greater client service and business innovation.

Flexibility

Apps and data are securely accessible via the internet across multiple browsers and devices. It's easy to work on the go because software isn't tied to the unique device.

Backup in the Cloud

Law firms are reliant on the easy and fast retrieval of files to comply with standards and to make business operations simple. RapidScale's solutions eliminate the headache of data loss and provide real-time backup and retrieval so that no matter what happens, your data is safe.

The cloud promotes easy information sharing between lawyers and clients by offering 24/7 access to documents and apps from any device, whether you are in the office or working remotely. With your critical data and applications hosted centrally in the cloud, your firm's work will remain synchronized.

Cloud computing isn't just more convenient. It's also more cost efficient than traditional hardware and maintenance. RapidScale's cloud technology does not remain vulnerable, slow down over time, or require IT upkeep. Firms can now store client data, financial records, legal documents, and more on the cloud in a secure facility, instead of at risk in-house - with predictable pricing.

Use of cloud services is increasing in the legal industry, with many firms relying on it for some aspect of their business, whether it's billing, time tracking, document storage, or a full-fledged law practice management software system.

Cloud Security

RapidScale offers high-quality protection for your data and information in our secure, redundant and geographically diverse data centers. Our Tier 3 PCI DSS-certified data centers, which are audited annually to produce a SOC 2, Type II report, help keep your sensitive information safe and secure.

All of RapidScale's data centers feature:

- On-premises security guards
- Exterior security systems
- Biometric security systems including palm scanners
- Continuous digital surveillance and recording

They're engineered to the highest of standards to help keep your business running 24/7/365. RapidScale's 100% US-based certified network experts and engineers are available around the clock, ensuring you always have someone to turn to with questions or concerns.

- Complete data encryption in transit and at rest
- Cisco routers, and Fortinet and vShield Edge firewalls with 256-bit encryption

Cost Efficiency

Cloud services can optimize IT resources and greatly reduce capital expenses and operating costs. Instead of building for maximum capacity, you can allocate the cloud storage and resources you need to manage your IT landscape for optimal storage, application processing and IT workload needs. You'll also experience automatic updates while avoiding the headache of hardware refreshes.

Application Integration

RapidScale simplifies application purchasing and license management for your business. We can integrate some of the most commonly used business apps into your cloud environment, including MyCase, Alfresco One, Clio, QuickBooks, ShareFile, and Microsoft Dynamics.
