

Cloud for Nonprofits

Nonprofit organizations rely on effectively running on a limited budget, which can cause problems when it comes to upgrading to new technology. RapidScale, a Cox Business company, offers secure, scalable and cost-efficient cloud services that allow nonprofits to access the same advanced and secure computing solutions that today's enterprise organizations use.

Management

We take on the management of your infrastructure, leaving your team time to strategize and innovate in areas like marketing and product development.

Cost Efficiency

Investing in the latest technology has often been just a dream for nonprofits. With cloud services, you can eliminate many hardware, software and IT costs.

Security

The cloud allows nonprofits to benefit from higher levels of security. RapidScale helps incorporate the latest standards and controls.

Mobility

Nonprofits have people working everywhere. RapidScale makes it easy to access data from virtually anywhere, on any device, and maintain optimal collaboration.

Address Challenges Head On

Nonprofits face increased pressure, oversight, a public demand for transparency, competition for funding, and accountability for outcomes. Because of the budgetary and resource limitations they face, nonprofits can benefit from advanced managed cloud services.

Infrastructure can be expensive, especially when running it yourself and maintaining it in-house. Costs can include the physical hardware, updates, maintenance, and storage, just to name a few. RapidScale helps to reduce or eliminate these expenses with a simple and predictable monthly cost with none of the management hassle.

RapidScale can help you maintain regular communication with your donors and volunteers through cloud-based applications and services. Donors can keep track of their accounts and access important documents whenever they want. Having a solid, mobile-friendly approach will make your organization more attractive to potential donors and volunteers.

Cloud Security

RapidScale offers high-quality protection for your data and information in our secure, redundant and geographically diverse data centers. Our Tier 3 PCI DSS-certified data centers, which are audited annually to produce a SOC 2, Type II report, help keep your sensitive information safe and secure.

All of RapidScale's data centers feature:

- On-premises security guards
- Exterior security systems
- Biometric security systems including palm scanners
- Continuous digital surveillance and recording

They're engineered to the highest of standards to help keep your business running 24/7/365. RapidScale's 100% US-based certified network experts and engineers are available around the clock, ensuring you always have someone to turn to with questions or concerns.

- Complete data encryption in transit and at rest
- Cisco routers, and Fortinet and vShield Edge firewalls with 256-bit encryption

Cost Efficiency

Cloud services can optimize IT resources and greatly reduce capital expenses and operating costs. Instead of building for maximum capacity, you can allocate the cloud storage and resources you need to manage your IT landscape for optimal storage, application processing and IT workload needs. You'll also experience automatic updates while avoiding the headache of hardware refreshes.

Application Integration

RapidScale simplifies application purchasing and license management for your business. We can integrate some of the most commonly used business apps into your cloud environment, including Microsoft 365, ShareFile, Salesforce, QuickBooks, and DonorPerfect.
